

## JOB POSTING

Shelley Automation is a leader in providing cutting edge automation products and solutions to the Canadian industry. We are looking for a candidate who is goal oriented to be part of our dynamic team working from our Toronto office. If you are an individual that is enthusiastic about promoting and creating high-tech engineering solutions, this opportunity is for you.

This position requires the individual to work with the sales team to meet customer requirements by means of customer's sample evaluations, demonstrations, and presentations of technical solutions in front of technical and non-technical audiences. Some short travelling will be required.

Please submit resumes to [info@shelley.com](mailto:info@shelley.com)

## KEY RESPONSIBILITIES

- ✓ Provide customers system sizing and quotations;
- ✓ To develop a broad technical knowledge of machine and motion controls system;
- ✓ Sales initiatives to grow business for Automation and Motion Control from Scarborough - Kingston;
- ✓ Provide pre-sales and post-sales support to the customer as necessary.

## SKILL REQUIREMENTS

- ✓ "C" language programming experience is preferred.
- ✓ Some PLC programming experience is preferred.
- ✓ Experience with CAD software is preferred.
- ✓ Experience with machine vision and robotics is preferred.
- ✓ Must be self-directed and self-motivated; able to take daily assigned tasks and complete them with minimal direction or assistance.
- ✓ Excellent English and communication skills; personable & professional.

## EDUCATIONAL REQUIREMENTS

- ✓ A Degree or Diploma in an Engineering field such as Automation, Mechatronics, EE, ME or equivalent is required.
